# *Hello*

"Scarborough" is the emotional and uncompromising exposure of abusive relationships illustrated through two stories between students and their teachers.

It is a stark portrayal of coercion, corruption and control forcing audiences to examine their own attitudes and subconscious bias towards gender, power and the very nature of our relationships.

Due to the sensitive topic of child sexual abuse, "Scarborough" is recommended for audiences of 16+ years only. We will be also asking for donations to the charity SARSVI.
